RE: Taylor adhesives over EnStron Underlayment manufactured by Plummer Forest Products.

Joe,

We have completed the testing with our wood, carpet and resilient adhesives over the EnStron Underlayment. We confidently recommend and warranty all our adhesives for use over the EnStron Underlayment. The installation must be performed following both the flooring manufactures and Taylor's guidelines. Please visit [wftaylor.com](http://wftaylor.com) for the latest product information and application instructions.

If an installation failure occurs as a direct result of the use of defective adhesive, Taylor will pay for equivalent floor covering and adhesive materials and for reasonable labor costs to repair or replace the failed portion of the installation as determined by Taylor at its sole discretion. This warranty applies only to the adhesive related bond failures. However, W.F. Taylor cannot warrant those variables over which our company has no control. Factors such as the quantity of the adhesive used, the workmanship of the installer, the condition of the subfloor, the stability of the flooring product or its suitability for the installation on the particular job, excessive moisture or alkalinity, or any other conditions that might affect the installation.

W. F. Taylor reserves the right to inspect the cause for any claim as deemed necessary or this warranty is null & void. Any repairs done prior to inspection by a Taylor representative voids any warranty. This warranty is non-transferable.

Sincerely,

*Gary Scheidker*
